7. ☐ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other \_\_\_\_\_

### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest a method of manufacturing a bipolar graphite plate comprising forming a first component of a compressed mass of expanded graphite particles having a protrusion on a surface, forming a second component of a compressed mass of expanded graphite particles having a recess on a surface, and assembling the first component and second components such that the protrusion of the first component is received in the recess of the second component.

Applicants declaration submitted 1/3/06 further demonstrates a bonded bipolar graphite plate formed of an interlocking protrusion from a first component and recess from a second component has superior bond strength to that of a prior art bonded bipolar graphite plate formed of a first component and second component without an interlocking protrusion and recess, e.g. Dettling et al. (U.S. Patent 4,732,637).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **(571) 272-1216**. The examiner can normally be reached on M-F (7:15 AM - 3:45 PM).
